Govt

Customer Profile Insight

- The 26-35 female age group generated 31M, the single highest revenue segment.
- Avg transaction value is nearly identical - Male 5.0k vs Female 4.9k - only 100 rupees difference, suggesting males buy higher quantities per order, not higher priced items.

MARKETING ACTION -

- Target 26-35 female shoppers with loyalty rewards and repeat purchase incentives - they already shop frequently, and increase basket size.
- 36-45 age group = strong secondary segment - create family-focused Diwali gifting campaigns for both genders in this bracket

Occupation Insight

- IT Sector dominates total revenue at 14.8M with the highest order frequency(1,583 orders) - volume-driven purchasing Behavior.
- Healthcare (13M) and Aviation (12M) from a strong second tier, together with IT, contribute 38% of total Diwali revenue.
- Govt. professionals show the highest average transaction value at 10k - spending 700rs more per order than the IT sector, despite 46% fewer orders- classic premium buyer profile.
- MARKETING ACTION-
- IT + Healthcare + Aviation = volume strategy- bulk deals, early bird offers, loyalty programs.
- Govt. + Media + Chemical = premium strategy - exclusive high value product bundles.

Geographic Insight

- Central Zone dominates total revenue at 42M - 40% of national Diwali sales.
- Uttar Pradesh alone contributed 19.4M.
- However, Southern Zone buyers spend 9.9k per order- the highest average transaction value of all zones - indicating premium buying Behavior despite lower total volume.

MARKETING ACTION -

- Maintain central zone investment.
- Launch premium product campaigns in southern zone to convert high - value buyers into frequent shoppers.

Product Category Insight

- Food dominates Diwali revenue at 33.9M - 32% of total sales- despite not having the highest order volume.
- clothing & Apparel leads order Value at 2,655 transaction but generates only 16.5M - revealing lower price - point purchase at high frequency.
- Auto Category commands highest avg. order value at 20K - niche premium buyers with low frequency but maximum spend per transaction.

MARKETING ACTION-

- Food = Protect- highest revenue driver, invest in inventory and early festive promotions.
- Clothing = convert - highest order volume but low revenue per order, upsell premium collections to increase basket size.
